SUMMARY

B.Tech Computer Science student (graduating 2028) seeking a software engineering role. Built and deployed two full-stack Python applications end-to-end (FastAPI REST backends, JavaScript frontend, CI-based auto-deploys), including an LLM-powered app with a caching layer to cut redundant calls and latency. Experience writing readable, maintainable code and debugging production issues, plus internships in web development and data analysis with cross-functional remote teams. Comfortable integrating LLMs into real product flows.

EDUCATION

B.Tech, Computer Science | Dr. A.P.J. Abdul Kalam Technical University, Greater Noida, UP 2024 - 2028
Class XII (CBSE) | MM Public School | 89% 2024
Class X (CBSE) | MM Public School | 94% 2022

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, HTML, CSS
CS Fundamentals: Data Structures & Algorithms (basics), Object-Oriented Programming, Complexity Analysis, Problem Solving
Backend & Web: FastAPI, REST APIs, Web Services, Pydantic Schema Validation, CORS, Caching, Responsive Web Development, Debugging & Troubleshooting
Deployment & Tools: Git, CI-Based Auto-Deploy, Render, Vercel, Environment & Secrets Management, Agile
AI / LLM: Generative AI / LLMs, LLM API Integration (Groq), LLM Tool Calling, Schema-Constrained LLM Extraction, RAG, Prompt Engineering, Agentic AI
Data & ML: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Data Cleaning, EDA, Feature Engineering, Model Evaluation, Data Leakage Prevention

PROJECTS

AI-Powered Portfolio Chatbot | Python, FastAPI, Groq LLM API, JavaScript, pypdf Live demo
- Built and deployed a multi-service full-stack app: FastAPI REST backend on Render and JavaScript frontend on Vercel, connected over a CORS-enabled API.
- Designed a pipeline that turns unstructured resume PDFs (pypdf) into structured data using schema-constrained LLM extraction, with answers grounded only in that data to reduce hallucination.
- Optimized performance with a caching layer that processes data once per server instance, eliminating redundant LLM calls and reducing latency.
- Managed API secrets with environment variables and set up CI-based auto-deploys through Git.

Bug-Fixing Coding Agent | Python, Groq LLM API, Tool Calling, uv, Git GitHub
- Built a CLI coding agent from scratch in Python (no agent framework) where an LLM on Groq fixes simple bugs described in plain English in C, C++, Java and Python code.
- Implemented LLM tool calling with four tools (file search, in-file line search, file read, line replace), logging every tool call step by step and limiting file access to the chosen file or folder.
- Added a verify-and-retry loop: language-specific syntax checks, user confirmation, feedback to the LLM, a 4-attempt limit, and automatic restore of original files on failure.
- Handled real API issues (rate limits, malformed and repeated tool calls) and kept the API key out of Git using .env and .gitignore.

Mental Health Score Predictor | Python, FastAPI, Pydantic, Scikit-learn, Pandas, NumPy Live demo
- Built and deployed a full-stack application on Render with a FastAPI backend that validates all incoming requests with Pydantic schemas.
- Designed preprocessing and training pipelines that prevent data leakage, giving reliable performance on unseen data.
- Handled data cleaning, EDA, and feature engineering; built, evaluated, and tuned models to predict mental health scores.

EXPERIENCE

Web Developer Intern | 1Stop.ai (Remote) Sep 2025 - Nov 2025
- Developed responsive, cross-device web applications using HTML, CSS, and JavaScript.
- Collaborated with designers and engineers in a remote agile team to ship UI/UX improvements that met accessibility standards.
- Debugged and troubleshot code issues to maintain site functionality and reliability.

Data Analyst Intern | Brainwork TechnoSolutions Pvt. Ltd. June 2026 - July 2026
- Performed exploratory data analysis and feature engineering to surface patterns and insights on data analysis projects.
- Built predictive models and delivered all assigned work on time in a fast-paced environment.

AI & Public Speaking Intern | Teachwell Professional Studies Institute Pvt. Ltd. Aug 2026 (1-week program)
- Delivered a real-world AI project and presented technical problem-solving approaches clearly to non-technical audiences.

CERTIFICATIONS

- Oracle Certified Foundations Associate - Agentic AI, Oracle University, September 2026
- IBM SkillsBuild Data Analytics with AI Internship Program - IBM, AICTE & BharatCares, September 2026
- Introduction to MS Excel - Microsoft, October 2026
